Beginner's Guide to Sketching: Characters, Creatures and Concepts book downloadQ: Why isn't the free memory increasing in this example? The code is a text editor. When the memory becomes full, the program should start to free its memory, but it doesn't. Why? Relevant code: #include #include /* * This program will allocate memory blocks of a given size on the heap. * When there is no more space for the current block, the block will be * returned to the heap and the memory block will be refilled from the * heap again, until the program runs out of memory. */ /* This flag is used to mark whether a block is in use */ unsigned char *storage; unsigned char size; unsigned char *reallocate; unsigned char count = 0; int main() { storage = realloc(storage
